Not all the media files are supported, so please select the correct formats to play.

Card reader works with Yur.Media Box only and will not be recognize as a storage media when using the USB connection.

Caution:

- Please do not use this product in environments of high-temperature or high-humidity.
- Magnetic fields with special frequencies may affect data transfer.
- Please do not move or strike the media player when it is in working status.
- Please use the power adapter provided. Do not use other brands of power adapter as it may damage the product and void the warranty.
- Please powered off the mains before connecting the Media Player to other devices.
- High-temperature will be felt after prolong use; do not be alarmed by this as it is well within its own operating range.

Product Performances

3.1 Feature:

- Plays full version movies, music and pictures.
- Supports popular memory cards. (Note: The card reader works with the media player and TV monitor only, but not via the USB connector to the PC).
- Connects to Home Theater systems for family entertainment and enjoyment.
- Used as an external storage device.
- Multiple output ports connect with TV, VGA monitor and amplifier.
- Comes with DVD navigation functions and supports DVD IFO file format.
- Supports DVD wide-screen video display and multi-angle display, and also multi-language function.
- The song lyrics could be displayed together when play MP3 and WMA formats. (The media player supports LRC file format for music)
- Seven different EQ presets for Music playback.
- The media player is designed with fashionable streamline shape and aluminum housing.

3.2 Specification

- HDD capacity: up to 750GB.
- Maximum partition: 4 primary partitions
- HDD files system: FAT32
- Media files supported:
- Subtitle: SRT, SSA, SMI
- Audio: MP3, AC3, WMA, AAC, DTS
- Video: MPEG 1 / 2 / 4, XVID, DIVX, VCD file, DVD file (*.mpg; *.mpeg, *.dat; *.avi. *.vob)
- Image: JPEG, MJPEG
- Memory cards: CF, SD, MS, MMC, xD in FAT32 or FAT16 format (note: The card reader only could work when connect media player and TV together, but not work if media player and PC together).
- Output Modes: Composite video + L&R audio channels, VGA, S-video, and Progressive scan, Component video, Digital out coaxial, and optical.
- USB port: High speed USB2.0
- Digital out: Coaxial, optical
- Audio out: Analog stereo.
- Video out: CVBS, S-VIDEO, VGA, and YPbPr
- Image resolutions: 720 x 480 (NTSC, PbPr) / 720 x 576 (PAL, YPbPr) / 640 x 480 (VGA)
- Power supply: AC100 ~ 240V   50 / 60Hz
- Power dissipation：20W (Max)

4. Accessories

No.	Name	Quantity
1	Media Player	1 pc
2	Power Adapter	1 pc
3	Remote Control	1 pc
4	AV cable	1 pc
5	Progressive scan component video cable	1 pc

VOL-	Decrease volume
REPEAT	Repeat play mode: Select between different Repeat modes
INTERVAL TIME	Change the transition time between photos during Slide Show mode
SLIDE SHOW	Slide Show in continuous mode
OTB	One Touch Backup - Backup the data from memory card to hard disk directly
Music	Music playback
DVD	Access DVD navigation function
P/N	Choose between PAL / NTSC / MULTI-SYSTEM TV modes
SR	DVD playback with Slow forward mode
SF	DVD playback with Slow reverse mode
Preview	Select preview on or off in file mode. Right column preview window activated or disabled.

## 6. Product Operation

6.1 HDD Installation

**A** remove two screws from the back cover.
B Pull out PCB after back cover's removed.

C Connecting after hard disk driver's fixed.

D Fix 3 screws on side face of HDD.

E Lock the back cover after install into the housing.

F Fix two screws on back cover.
6.2 Device Connection

Connect the device as the following steps:

1. Digital out mode: for connection to a Digital decoder device. For example, to a Digital amplifier, you can select between coaxial or optical connections to enjoy the digital music.
Digital audio output mode

2. AV (CVBS) mode: press INPUT Source key of the TV, then turn to AV INPUT MODE. If no images, press VIDEO key on remote control and wait for a few seconds, then press again, until it turns to CVBS mode, then the main menu will display on TV.
AV OUTPUT MODE

3. YPbPr output mode (only for TV with this feature):
    select YPbPr as input mode for TV. Press VIDEO key
    on remote control to select YPbPr mode, the main
    menu will display on TV.

Audio output

Power
(Progressive scan component video)YPbPr output mode

4. S-video output mode: Select S-video as input mode for TV. Press VIDEO key on remote control to select S-video mode, the main menu will display on the TV.
S-video output mode

5. VGA output: connect to TV monitor with VGA D-sub socket, then press the VIDEO key on remote control to switch to VGA mode, the main menu will display on TV.

6. Connect to VGA monitor and press the VIDEO key to switch to VGA mode, the main menu will display on the monitor.
Mode of VGA Output

6.3 Usage of Memory card

1. Two memory cards, SD and MS, cannot be use at the same time as they are of the same slot.
2. Prior to inserting a memory card, please stop any playbacks.
3. A list of all mass storage devices will be displayed after a memory card is inserted, press ▲ ▼ keys to choose the right mass storage, press ENTER key to access the data in the mass storage device.

6.4 Operation

Main menu of the Media player: with two or more partitions in HDD, or external mass storage devices, the opening screen will appear as below.

SELECT ONE AND ENTER.

🖫   HARD DISK 1

🖫   HARD DISK 2

▭   MEMORY STICK

Depress up and down key to choose the data devices or partition

Depress ENTER key to access the main menu as below.

SELECT ONE AND ENTER.

In the main menu, there are four options, PHOTO, MUSIC, VIDEO, and FILE

PHOTO   MUSIC   VIDEO   FILE

Depress left or right key to select and then press ENTER key to access.

6.5 Play Picture:

Select PHOTO icon in main menu

Depress ENTER key to access the picture browse mode,

Select picture by pressing direction key.

Press ENTER key to start play normally.

6.6. Play Music:

Select MUSIC icon in main menu

Depress ENTER key to access music library

Depress direction key to select MUSIC, and ENTER key to

access music playback / EQ screen, and begin playback.

1. Song lyrics are displayed at the same time during MP3 and WMA playback. The lyrics in the LRC file could automatically be displayed if the LRC and song files are in the same folder, also these two filenames must be same.

6.7. Play Movies:

There are 2 ways of playing movies on the Media player, first via the VIDEO icon in main menu and secondly via the FILE icon (file manager) using the DVD playback functions.

VIDEO playback:

Select VIDEO icon in main menu, press ENTER key to access the preview screen with 2 x 2 matrix preview.

Press direction key to select the movie and

Depress ENTER key to play.

For multiple storage sources, please ensure the correct partition or storages are selected first via the File manager

MPEG4 Subtitle Operation:

Put the subtitle file and video file in same folder.

In file library, first press SUB-T key to choose file subtitle, then choose video files and

Depress ENTER key to play.

DVD playback:

DVD playback is similar to the operation of the DVD player.

Press DVD button on remote control to move to highlight line to select navigation function, and the navigation menu will be displayed on the TV screen.

How to play the sample movie <<car>> DVD?

   a. Connect the player to the computer by USB cable. The computer recognized the Media player as a USB mass storage device.

b. Create a folder in the mass storage of the media player. Example, in E:/ drive, create a folder called "e:\car". Then copy all files of <<car>> DVD to e:\car folder from DVD disc or HD.

c. Then safely remove and unplug the USB cable. Connect the AV cable to TV.

d. Enter into file manager, select car folder and press the DVD button and operate the media player just as in a DVD standalone player.

Note: all contents of DVD must be copied to the car folder including all the empty ones. Otherwise it cannot execute the show.

6.8. Management file

Select the FILE icon in the main menu;

Press ENTER to access File list.

Press direction key to select file, press ENTER to play the selected one.

Select the folder icon that locates at top of the file management, Press ENTER key to return to the main folder.

COPY file(s):

In the file manager with a file being selected, depress the RIGHT direction key, a command dialog list will appear

Select the copy command and click ENTER key, the target folders will appear on the right screen.

Press RIGHT direction key, the list will switch to the right screen, and then select a folder for backup and press "ENTER".

Press LEFT direction key to return to left screen and the list will switch to the target file on left screen, press ENTER to copy.

```
              FILE   LIBRARY
  📁 ..              File size:    665 Bytes
  📁 PL X507 INF  COPY            2005/11/24
  📄 README      DELETE
                 CANCEL

  Foder:PL2506_WI        HD2      002/002
```
Additionally, there is the OTB function for memory cards. Press the "OTB" key on remote controller or press the "ENTER" on the control panel for several seconds to copy the data from the memory card (s).

Delete file(s):

Select the target files

Depress RIGHT direction key and the command dialog list appears

Select DELETE to erase the file(s).

6.10 Used as a Storage Device

Initial use for computers with Windows 98 SE must install with the USB Mass Storage driver first.

Connect the Media player to computer through USB cable

Power on the media player, the installation process will be initialized in computer accordingly.

Upon successful detection and installation, the "Safely Remove Device" applet will appear at bottom right of the system tray or notification area

The Media player is being recognized as a storage device and you can backup files into the media player from computer.

Always use with the included power adapter on the Media player.

Partition and Format of Hard disk

NOTE:

To ensure proper hard disk operation, please partition and format before using.

Please operate strictly according to the illustration and explanation.

The product could not be recognized by PC if the hard disk is brand new, please partition and format the hard driver in FAT32 file format first. Older or used hard disk need to be reformatted to FAT32 format.

Please note all data in the hard disk will be deleted when partition or format every time.

To ensure the stability and proper operation, partition and format under Windows 2000 / Windows XP operating system.

For any doubt, please contact the after service department for further help.

7. SYSTEM SETUP

Press SETUP key to access system setup functions.

System setup options:

1. **Music setup:** set up Repeat and Auto Start functions

Auto Start function: select ON and the player auto-play music whenever the unit is power on.

2. **Movie setup:** set up Repeat and Subtitle Size functions

3. **Slideshow setup:** set up Folder Repeat, Interval Time, and Transition functions

4. **Preferences setup:** set up TV types, Video output, OSD Language and Configuration functions.

   TV types:

   MULTI-SYSTEM: this setting will do automatic TV system switching according to the source broadcast signal coming into the TV itself (Note: the TV itself must support Multi-System inputs and outputs).

   NTSC（Taiwan, USA, Japan etc.）

   PAL（Europe, mainland of China etc.）

   Video output: switch output modes between AV/S – video, P-Scan, YPbPr, and VGA

   OSD language: selection for different OnScreen Display (OSD) languages. En / Fr / De / IT / Port / Dutch.

8. Appendix.

Function description:

Features	USB 3.5" hard disk with media playback functions
Output interfaces	Digital out coaxial, optical. AV output interface, S-video, Progressive scan component video output interface; VGA output interface, power interface
Media formats	Audio: MP3, AC3, WMA, DTS, AAC Video: MPEG1/2, MPEG4, Divx, Xvid, VCD file, DVD file (*.MPG, *.MPEG, *.DAT, *.AVI, *.VOB, *.MP4) Photos: JPEG (*.JPG)
Audio output	Analog stereo
Digital output	Coaxial, Optical.
Video output	Composite video output (CVBS), TV system NTSC / PAL VGA output (D-sub) Progressive scan component Video output S-video
Power supply	AC100V - 240V
Bus interface	USB2.0 interface
Supported memory cards	CF / SD / MS / MS PRO DUO / MMC / xD

Physics parameter：

Outline dimension	214mm X 157mm X 56mm
Product material	Aluminum

Product certificate specification：
