

PRESS RELEASE

Yuraku Pte Ltd releases one of the smallest wireless, and portable Internet Radio Player with IEEE 802.11b/g support.

YUR.BEAT FUSION STREAM

Singapore 09.06.2007

Yuraku Pte Ltd of Singapore releases the world first Portable Wireless Internet Radio with full Multimedia features. Support Wireless LAN IEEE 802.11b/g protocol with WEP encryption security (personal). Multimedia functions with MP3, MP4 playbacks, FM radio, Picture frame with slide show functions, and Media streaming music playback.

The Fusion Stream allows you to listen up to 10,000 Internet Radio stations via vTuner server through your Wireless broadband connection. The MP3 functions playback digital MP3, and WMA music files. The Movie player plays your favourite MP4 / AVI movies. You can either play from the based memory or via the MicroSD interface which provide higher memory capacity. The Media Streamer allows you to playback MP3 music from any shared computer station in your local network.

Standard FM radio features allows you to tune into your traditional free-to-air broadcast. The Fusion Stream also serve as a Picture display frame with standard slide playback capabilities.
